Email: customerservice@deflecto.com

HOW TO DESIGN YOUR CHAIRMAT

1. Use the template on the second page to draw your custom chairmat. Be sure to list a dimension for all sides.
2. To make drawing easier, the template is a grid and each box should be designated a specific size. For example, each box could be 1" square, 2" square, etc. This will help you when drawing your new chairmat and help us visualize the new mat.
3. Next, select the MAT TYPE and EDGE TREATMENT you would like for your custom mat.

Please select the appropriate box:

MAT TYPE

Studded:

- ExecuMat® (high pile)
 RollaMat™ (medium pile)
 SuperMat™ (medium pile)
 Glass Clear (medium pile)
 AntiStatic (SuperMat™ only) (medium pile)

Non-Studded:

- Hard Floor

EDGE TREATMENT

- Beveled Edge
 Straight Edge

4. Follow the steps below to calculate the total square feet of your new chairmat.

CALCULATING COST

Step 1: Make a sketch of the custom mat required

Step 2: Calculate the total square feet of the rectangle (length in inches x width in inches divided by 144) and round up to the nearest full square foot.

Step 3: Multiply total square feet from Step 2 by the cost of the desired mat type.

Easy to Order Example:

Step 1: Sketch mat — 58" width x 91" length

Step 2: 58" x 91" = 5,278 sq. in. ÷ 144 = 36.65 (round to 37 sq. ft.)

Step 3: 37 sq. ft. x \$ _____ per sq. ft. = \$ _____ (price)

5. Once the steps above have been completed, fax or take this information to your local dealer to obtain a price quote and to place your order. To locate a dealer in your area, please call us at 1.800.428.4328. (NOTE: Deflecto LLC does not sell directly to the end-consumer.)

Important Notes to Remember:

- No internal cuts or holes can be made in custom mats
- All mats are cut to a tolerance of + or - 1/2 inch
- All corners are slightly rounded
