

STACKABLE TILT BIN® CADDY

The possibilities are endless with Deflecto's new storage solution.

The Stackable Tilt Bin Caddy combines the portability of our original Stackable Caddy, with the accessibility of our Tilt Bins. The new caddy system allows multiple caddies to stack using the lift and lock feature built into the handle, and the Tilt Bins stay in place by turning the knobs on the outside of the unit to the locked position. This helps keep your supplies secure when not in use, or when you're on-the-go.

Access to supplies is quick and easy - unlock the side knobs and simply tilt out each bin - even while stacked. Each caddy unit contains four removable tilt bins.

Patented.
